

PROCESS TO GATHER DATA FOR EVALUATION OF COURSE OUTCOMES (COs)

Direct Assessment at Course Level

Indirect Assessment at Course Level

Internal Assessment

University Examination

Feedback on achievement of COs by a student sample is conducted

COs defined for each Course

Each subpart of University Exam Question paper is mapped with COs

Attainment level for each CO by Indirect Assessment is calculated based on preset conditions

Each subpart of every Assessment tool mapped with COs

Average Attainment level for University Exam is calculated based on total obtained by each student and preset conditions

A weightage of 10% is provided to Attainment levels based on Indirect Assessment

Assessment tool conducted

Marks obtained for each student in every subpart of Assessment tool are consolidated

Attainment level for each subpart of Assessment tool calculated based on preset conditions

Attainment level (CO wise) is calculated for each Assessment tool

Average Attainment level for all Assessment tools of a Course are calculated by averaging

A weightage of 30% is provided to Average attainment levels for Internal Examinations

Weighed Attainment level for each CO based on direct assessment is calculated

A weightage of 90% is provided to Weighed Attainment level based on Direct assessment

Final Attainment level for each CO for a particular Course is calculated
